### From the EJP Network ...

Fundraising for St John's University  
Dodoma Tanzania - Fence Appeal -  
**we have passed our goal!**

The EJP network would like to thank the Parish for getting behind this project wholeheartedly and with generosity.

A total of **\$3,505** was raised and has now been sent on to Ed Aid. Over \$200 was raised at the Pumpkin Stall last Sunday - thanks to all who contributed.

Fundraising efforts here and elsewhere have galvanized St John's in Dodoma to move ahead immediately with the first phase of the work.

Thanks to Robin Gwynn for this very worthwhile initiative and the EJP team and Parish that supported it.

## ENVIRONMENT JUSTICE AND PEACE NETWORK

EJP recommends the Pope's Encyclical (Laudato Si), on the Environment, for your reading. *(It's actually quite readable!)*

The human environment and the natural environment deteriorate together; we cannot adequately combat environmental degradation unless we attend to causes related to human and social degradation ... The Earth, our home, is beginning to look more and more like an immense pile of filth. In many parts of the planet, the elderly lament that once beautiful landscapes are now covered with rubbish. ... Industrial waste and chemical products utilised in cities and agricultural areas can lead to bioaccumulation in the organisms of the local population ... Frequently no measures are taken until after people's health has been irreversibly affected.

These problems are closely linked to a throwaway culture which affects the excluded just as it quickly reduces things to rubbish. To cite one example, most of the paper we produce is thrown away and not recycled. ... our industrial system, at the end of its cycle of production and consumption, has not developed the capacity to absorb and reuse waste and by-products.

The climate is a common good, belonging to all and meant for all. At the global level, it is a complex system linked to many of the essential conditions for human life. A very solid scientific consensus indicates that we are presently witnessing a disturbing warming of the climatic system. ... Humanity is called to recognise the need for changes of lifestyle, production and consumption, in order to combat this warming or at least the human causes which produce or aggravate it.
